

Nishtha Sahani

Software Developer | Full-Stack Engineer | React Developer | Backend Engineer
Lucknow, India | nishthasahani7@gmail.com | +91 7355504901 | GitHub | LinkedIn | Portfolio

SUMMARY

Final-year B.Tech CS (AI) student at BBDU Lucknow with strong fundamentals in data structures, algorithms, and full-stack development. Shipped production-grade applications independently — including a solo 48-hour hackathon build at IBM's Dev Day 2026. Experienced with React, FastAPI, Node.js, Firebase, and cloud deployment via Vercel & Render. Active on LeetCode and GFG with consistent DSA practice. Targeting Summer 2027 Software Engineering internships.

EDUCATION

Babu Banarasi Das University, Lucknow 2023 – 2027
B.Tech – Computer Science Engineering (Artificial Intelligence)

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, HTML, CSS, SQL
Frontend: React.js, Next.js (basics), Tailwind CSS, Recharts, Leaflet, Responsive Design
Backend / APIs: Node.js, FastAPI, Flask, Express.js, REST APIs, Firebase
Databases: MongoDB, Firebase Firestore, PostgreSQL, MySQL, SQLite
Cloud & DevOps: Git, GitHub, Vercel, Render, AWS (basics), Postman, VS Code
DSA & CS Fundamentals: Data Structures & Algorithms (LeetCode + GFG — Arrays, HashMaps, Strings, Trees, Sliding Window), OOP, System Design, Modular Architecture

PROJECTS

AI Code Explainer Jan–Feb 2026 | Live
IBM Bob Dev Day Hackathon 2026 · Solo | React · Flask · Groq API (Llama 3.3 70B) · Prompt Engineering · Vercel · Render
– Engineered 5 purpose-built AI modes (Explain, Comment, Summarize, Optimize, Debug) using structured prompt engineering on Llama 3.3 70B via Groq API
– Built a custom language-aware chunking algorithm using regex to split large files by function/class boundaries — handles real codebases, not just snippets
– Supports 12 languages (Python, JS, TS, Java, C++, Go, Rust, SQL, etc.) with auto-detection from file extension
– Flask REST API with structured JSON responses and graceful error handling; React frontend on Vercel, backend on Render — both live

CampusConnect — Smart Campus Utility Platform Live
Hackathon · BBD Auditorium, BBDU | React · Node.js · Firebase Firestore · Gemini API · Vercel Serverless · CI/CD
– Architected a serverless backend using Node.js Vercel Serverless Functions with 7 REST API endpoints — eliminating need for a dedicated backend server
– Integrated Gemini REST API for 3 AI features: semantic lost-item matching, automatic item categorization, and intelligent notes summarization with tag extraction
– Implemented Firebase Firestore (NoSQL) for real-time data persistence and Firebase Google OAuth for one-click authentication
– Deployed entire application on Vercel with zero-config CI/CD — every GitHub push auto-deploys; full ownership from UI to backend to deployment

ACHIEVEMENTS & CERTIFICATIONS

Hackathons & Competitions

- **INNVEDX Hackathon — 1st Place** · BBDU via Unstop; built and deployed Vedic Financial Engine under time pressure
- IBM Dev Day: AI Demystified 2026 — Solo; shipped AI Code Explainer in under 48 hours, live on Vercel & Render
- CampusConnect Hackathon — BBD Auditorium; full-stack AI platform with serverless backend and CI/CD
- Coderush 2.0 Hackathon — Participated, organized by BBDNIIT (April 13, 2026)

Certifications

- Outskill — Gen AI Engineering Mastermind
- be10X — AI Tools & ChatGPT Workshop (April 6, 2025)
- IBM Dev Day: AI Demystified — Certificate of Participation (Jan 29 – Feb 1, 2026)
- AWS Cloud Practitioner Essentials — Cloud fundamentals and AWS core services

- Oracle OCI AI Professional — In Progress
- Yuva AI for All — TCS & NASSCOM Foundation

Currently Learning

Docker · System Design · TypeScript · LeetCode DSA (Arrays, HashMaps, Strings, Trees, Sliding Window)
