

NISHTHA SAHANI

nishthasahani7@gmail.com | +91 7355504901 | Lucknow, India
github.com/nishtha-sys | linkedin.com/in/nishtha-sahani-2209aa236

EDUCATION

B.Tech – Computer Science Engineering (Artificial Intelligence)

CGPA: 7.64 / 10

Babu Banarasi Das University, Lucknow | 2023 – 2027

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, HTML, CSS, SQL

Frontend: React.js, Streamlit, Recharts, Leaflet, Responsive Design

Backend / APIs: FastAPI, Flask, Node.js, REST APIs, Firebase

AI & ML: Prompt Engineering, Groq API (Llama 3.3 70B), Rule-based NLP, Scikit-learn, PyTorch (basics), Pandas, NumPy

Cloud & Tools: Git, GitHub, Vercel, Render, Firebase, Oracle OCI, Streamlit Cloud

PROJECTS

AI Code Explainer | ai-code-explainer-ruddy.vercel.app | github.com/nishtha-sys/ai-code-explainer **IBM Bob Dev Day Hackathon 2026 · Solo · 48 hrs**

React · Flask · Groq API (Llama 3.3 70B) · Prompt Engineering · Vercel · Render

- Built and deployed a full-stack AI tool with **5 modes** — Explain, Comment, Summarize, Optimize, Debug — using structured prompt engineering on Llama 3.3 70B via Groq API; shipped solo in 48 hrs
- Engineered a **custom language-aware chunking algorithm** (regex, function/class boundary detection, line-based fallback) to handle real codebases beyond API token limits; supports **12 languages** with auto-detection
- Flask REST API with validated inputs & structured JSON on Render; React frontend on Vercel — both live, CORS configured, **zero credentials** in the public repo

CampusConnect — Smart Campus Utility Platform | github.com/nishtha-sys | campusconnect-black.vercel.app |

Hackathon Project · BBDU

React · Node.js · Firebase · AI/NLP

- Built multi-module platform (lost & found, notes sharing, student collaboration) targeting **real deployment at BBDU** — not a demo
- Integrated **AI-powered note summarization** with graceful fallback for uninterrupted UX; real-time Firebase sync with concurrent user handling
- Service-based backend — each module independently deployable and scalable

Ship Trajectory Anomaly Detection | github.com/nishtha-sys

In Progress · Team of 4 · GitHub Lead

React · FastAPI · Scikit-learn · PyTorch · Pandas · Leaflet · Vercel · Render

Role: GitHub Lead · Deployment · Integration · Architecture

- Own the entire GitHub repository — branching strategy, code review workflow, and contributor onboarding across a **team of 4**
- Coordinating integration between **ML anomaly detection model**, FastAPI backend, and React frontend; both deployed live on Vercel & Render
- Real-time map visualization of flagged maritime anomalies (illegal fishing, route deviations) using Leaflet/Mapbox; maintaining full **architecture diagrams and developer documentation**

ACHIEVEMENTS & CERTIFICATIONS

IBM Bob Dev Day Hackathon 2026 — Solo Entry (SoloCoders)

- Shipped full-stack AI product (React + Flask + Llama 3.3 70B) solo in 48 hrs; live on Vercel & Render
- Used IBM Bob for architecture review, unit test generation, security audit, and documentation

1st Place — INNVEDX Hackathon, BBDU via Unstop

- Built and deployed **Vedic Financial Compute Engine** — modular fintech system on Streamlit Cloud; delivered from ideation to live product under time pressure

Oracle OCI AI Professional (In Progress) — AI model deployment and cloud infrastructure

IBM Dev Day AI Demystified / Tech Domain Certification — ML workflows and AI fundamentals

Yuva AI for All — TCS & NASSCOM Foundation; supervised/unsupervised learning, responsible AI
