

NISHTHA SAHANI

Final-Year B.Tech CSE (AI) · GenAI Engineer / Full-Stack Developer
Lucknow, India | nishthasahani7@gmail.com | +91 7355504901 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Final-year B.Tech CSE (AI) student at Babu Banarasi Das University, Lucknow (2023–2027), with hands-on experience shipping production-grade full-stack and AI-powered applications end-to-end. Solo-built and deployed an LLM-powered code analysis tool at IBM Bob Dev Day 2026 in under 48 hours. Currently upskilling through Infosys Springboard's Pragati: Path to Future (Cohort 9), a competitive women's AI/Data Science program. Comfortable across React, Node.js, FastAPI, Flask, Groq/Gemini APIs, Firebase, and scikit-learn/TensorFlow, with consistent DSA practice and a 1st-place hackathon win.

EDUCATION

Babu Banarasi Das University, Lucknow

2023 – 2027

B.Tech – Computer Science Engineering (Artificial Intelligence) · CGPA: 7.77 (most recent semester)

EXPERIENCE

Infosys Springboard — Trainee, Pragati: Path to Future (Cohort 9)

Jul 2026 – Present · Lucknow (Remote)

- Selected for a flagship 12-week women's upskilling program by Infosys Springboard, covering AI, Data Science, NLP, and Cloud Computing.

GRAS tech (GRAS Education & Training Services Pvt. Ltd.) — Data Science & AI Trainee

Jun 2026 – Jul 2026 · Lucknow (On-site)

- Completed a 90-hour industry-oriented training program covering the full ML/DL/NLP pipeline.
- Delivered and deployed a capstone project using Streamlit/Flask, with the full workflow tracked on GitHub.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, HTML, CSS, SQL

AI & ML: Prompt Engineering, Groq API (Llama 3.3 70B), Gemini API, RAG, LangChain, Scikit-learn, TensorFlow, Pandas, NumPy, NLP (TF-IDF, tokenization, transformer basics)

Frontend: React.js, Tailwind CSS, Recharts, Leaflet, Streamlit, Responsive Design

Backend / APIs: Node.js, FastAPI, Flask, Express.js, REST APIs, Vercel Serverless Functions

Databases: Firebase Firestore, MongoDB, PostgreSQL, MySQL, SQLite

Cloud & DevOps: Git, GitHub, Vercel (CI/CD), Render, AWS, Oracle OCI, Streamlit Cloud

DSA & CS: Arrays, HashMaps, Strings, Trees, Sliding Window (LeetCode + GFG) · OOP · System Design · Modular Architecture

PROJECTS

AI Code Explainer — IBM Bob Dev Day Hackathon 2026 · Solo [GitHub](#) [Live App](#)

Engineered 5 purpose-built AI modes (Explain, Comment, Summarize, Optimize, Debug) using structured prompt engineering on Llama 3.3 70B via Groq API; supports 12 languages with auto-detection. Designed a custom language-aware chunking algorithm that splits codebases by function/class boundaries to handle real production files beyond API token limits. Shipped a Flask REST API + React frontend solo in under 48 hours — both frontend (Vercel) and backend (Render) live and publicly accessible, with graceful error handling and structured JSON responses

React · Flask · Groq API (Llama 3.3 70B) · Prompt Engineering · Vercel · Render

CampusConnect — Smart Campus Utility Platform — Hackathon Build, BBDU [GitHub](#) [Live App](#)

Architected a serverless backend with 7 Node.js Vercel Functions; integrated Gemini API for 3 AI features — semantic lost-item matching, automatic item categorization, and intelligent notes summarization. Implemented Firebase Firestore for real-time data persistence and Google OAuth for one-click authentication across all platform modules. Deployed on Vercel with zero-config CI/CD — every GitHub push auto-deploys; owned the project end-to-end from UI design to serverless backend.

React · Node.js · Firebase Firestore · Gemini API · Vercel Serverless Functions · CI/CD

SMS Spam Classifier — ML Web App [GitHub](#) [Live App](#)

Built an NLP pipeline (tokenization, stopword removal, TF-IDF vectorization) to classify SMS messages as spam or ham. Trained and evaluated multiple scikit-learn classifiers, selecting the best-performing model on precision/accuracy; deployed as an interactive Streamlit app

Python · Scikit-learn · NLP (TF-IDF) · Streamlit

ACHIEVEMENTS & CERTIFICATIONS

Hackathons & Competitions

- INNVEDX Hackathon — 1st Place, BBDU via Unstop; built and deployed the Vedic Financial Compute Engine under time pressure.
- IBM Bob Dev Day Hackathon 2026 — Solo entry; shipped AI Code Explainer (React + Flask + Llama 3.3 70B) in under 48 hours, live on Vercel & Render.

Certifications

- Microsoft AI Skills Fest 2026 — Microsoft
- IBM Dev Day: Bob Edition — Certificate of Participation, IBM (May 2026)
- Outskill — Gen AI Engineering Mastermind (Certificate of Completion)
- Oracle OCI AI Professional — AI model deployment and cloud infrastructure (In Progress)
- Yuva AI for All — TCS & NASSCOM Foundation; supervised/unsupervised learning, responsible
